SUMMARY

Frontend software engineer specializing in design systems, accessibility, and user experience

WORK EXPERIENCE

Senior Software Engineer, Frontend
BambooHR, Draper, UT (Dec 2020 - Sept 2026)

Frontend B2B SaaS application development and team technical lead with a focus on design systems and accessibility
- Created, maintained, and documented 175+ React components for our design system component library
- Led accessibility initiatives to increase compliance with WCAG 2.2 AA standards
- Determined technical requirements and feasibility for upcoming projects
- Planned and executed site-wide page structure changes to make the website responsive and support mobile devices, facilitating growth into new customer sectors
- Incorporated AI tools throughout the software development lifecycle
- Wrote AI skills and agents to streamline processes and facilitate internal developers consuming our component library

Frontend Software Engineer / Senior Frontend Software Engineer
O.C. Tanner, Salt Lake City, UT (Jun 2015 - Nov 2020)

Frontend web application development with a focus on internationalization and accessibility
- Team lead for the three frontend developers on our cross-functional team
- Supported legacy and modern systems that served large and international corporate customers
- Coordinated with product management, UX designers, test engineers, and fellow developers to create new features and improve development workflow
- Updated multiple apps and custom component library to meet WCAG 2.0 AA accessibility standards
- Updated UI to improve user experience and increase application security
- Increased unit test coverage to more than 80% to ensure code quality
- Handled build, packaging, and deployment processes for multiple web apps

Associate Web Developer / Web Developer
FamilySearch, Salt Lake City, UT (Sept 2011 – May 2015)

Frontend web development creating a genealogy family tree web app using AngularJS in a Node.js environment
- UI/UX with a focus on internationalization
- Testing/TDD using Karma, Mocha, JSDom
- Used and configured build tools including Webpack and Babel

EDUCATION

BS Physics – Astronomy, Mathematics minor, Brigham Young University 2004

SKILLS

- Web Accessibility
- Accessibility Testing
- Responsive Design
- Design Systems
- Component Libraries
- Storybook
- JavaScript
- TypeScript
- HTML
- CSS
- React
- Node.js
- SaaS
- CI/CD
- CSS Preprocessors
- REST
- Microservices
- Micro-frontends
- Frontend Architecture
- AI Agents
- AI Skills
- Claude Code
- Cursor
- Git
- Agile/Scrum
